MANIFOLD CHAMBER MUOVIPORT

UP TO 120 COLLECTORS

FOR LARGE PROJECTS

MuoviPort is made of polyethylene and is designed for projects where a larger chamber with many connections is needed. Up to 120 collectors can be connected to each chamber and, if necessary, several chambers can be connected in series and reverse return configurations.

COVERING LID

Fixed polyethylene push on lid and gasket, with stainless steel locking bolts as standard.
Vehicle proof access cover up to 40 tonnes or a lockable composite 1.5KN lid.
All available with adjustable telescopic riser extension.

CONTENT

The standard version of MuoviPort is equipped with our flow meter, Tacosetter Hyline, which is made of reinforced plastic. MuoviPort can also be equipped with most models of valves and flow meters in our range.

EACH CHAMBER IS PRESSURE TESTED

Each chamber undergoes several hydraulic pressure tests during each stage of manufacture to ensure that the chamber and the manifold components are sealed and leak free.
All the extruding connections are welded to the chamber wall to prevent ingress of ground water.

BESPOKE SPECIFICATIONS

Contact us and we will meet your preferences regarding orientation, valve flow rates, header dimensions and number of connections.

PROPERTIES

- Waterproof
- Easy access for system adjustment and maintenance
- Equipped with flow meters
- Resistance to material corrosion
- Excellent pressure resistance parameters
- High resistance to deformation
- Material durability

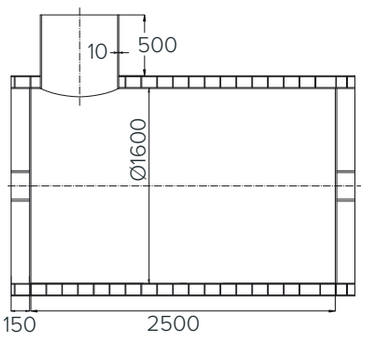
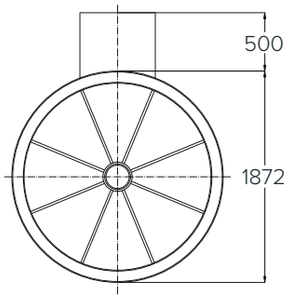
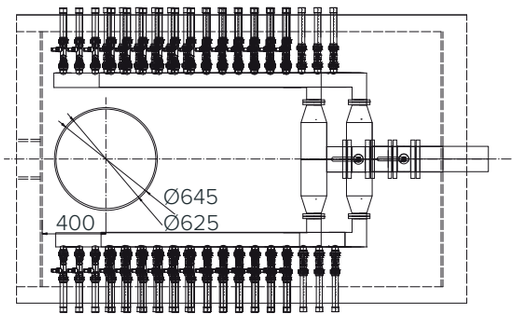
MANIFOLD CHAMBER MUOVIPORT

PRODUCT INFORMATION

Dimensions excl. extension ring:	DN1600, H 1872mm, L 2,5m, 3,0m and 3,5 m
Material:	PEHD SN8
Colour:	Black
Header:	Ø40-160mm
Connections:	Up to 120 x collectors, Ø32-50mm







ACCESSORIES

Product examples

Flowguard NC
STAD Valve DN25
STAD Valve DN32
TacoSetter Hyline DN32
Air Vent Mefco DN25
Composite cap 1,5 tons
Vehicle proof cover 40 tons
Plastic cap
