

MANIFOLD CHAMBER DN650

UP TO 3 COLLECTORS.

SMALLER PROJECTS

DN 650 Chamber is made of polyethylene and designed for smaller projects. If necessary, several chambers can be connected in series or reverse return configurations.

COVERING LID

Fixed polyethylene push on lid and gasket included as standard. Vehicle proof access cover for 40 tonnes or lockable composite 1.5KN lid. All available with adjustable telescopic riser extension.

CONTENT

DN 650 can be equipped with most models of valves and flow meters in the MuoviTech range.

EACH CHAMBER IS PRESSURE TESTED

Each chamber undergoes several hydraulic pressure tests during each stage of manufacture to ensure that the chamber and the manifold components are sealed and leak free. All the extruding connections are welded to the chamber wall to prevent ingress of ground water.

BESPOKE SPECIFICATIONS

Contact us and we will meet your preferences regarding orientation, valve flow rates, header dimensions and number of connections.
