

KAX CONTAINER

Sedimentation container separates drill cuttings and water.

MuoviTech is the general agent for the whole of Europe.

CUSTOMIZE COLOR

The container is available in a custom color to match your logo and company profile.

Standard color: RAL 7024 Graphite gray (exterior only)

USE

Kax Container - a container that separates drill cuttings and water. The container provides virtually particle-free surplus water, which prevents drilling cuttings from entering the municipality's pipe network.

PRODUCT INFORMATION

Volume: 10m³ (Kax 3,5 m³)

Net weight: 2300 kg

Corrosion resistant: 50my

Material: S355 MCD

ACCESSORIES

Hook lift.

Repainting of existing container.

New inlet with 90mm rubber + gasket + mounting bolt and screw.

6 inch pipe instead of regular 5 inch on inlet.

FOR THE ENVIRONMENT

Water analysis done on drilling water by Stockholms Water:

1100 mg / l - Measurement made after five hours of drilling with circulation system.

420 mg / l - First flush.

370 mg / l - Measurement made about ten minutes after unmade measurement (approx. 8m³ / hour).

110mg / l - Lower flow and a more porous ground.
